MEDIA TOWER

DISPLAY

DESIGN BCI

The ultimate display tower for presenting various media and new books!

The Media Tower is constructed from 32 mm diameter round steel tube and available in two heights: 152 cm and 182 cm. Three different shelves are offered which nest in a complex chrome wire carriage system that provides an airy, almost floating appearance. Depending on the selected height, sixteen to twenty shelves can be contained within the tower.

A sign profile is available to adorn the tower top on all four sides. Tower and shelves are available in all our standard steel colours. The Media Tower is also available with castors.
