

## Summer, Sun, Beach and a nice Picture Book

Design your kids' area like a beach and your youngest readers will feel like on vacation there. The prominent picture book boxes are shaped like sailing boats and have a signal effect. The hull is ascending to the front and underlines the dynamics of ships giving you the option to place the books by age: the flat rear for the very young ones – the bow for the older ones. The reading ships are available with either 6 shelves or with 4 shelves and an additional table board. The direct assignment of the reading tables to the storing furniture creates optimum exciting selection and reading options while standing or sitting.

The reading ships can be placed free-standing and be randomly combined with additional beach accessories. Wooden landing stages for sitting underline the outdoor character of this water world and invite to immediate reading. Square picture book boxes in various heights and round seat pillars add to the combination options, too.
